

JOINT SERVICE NBCD EQUIPMENT ASSESSMENT PROGRAM

Program Manager

Responsibilities

- Chairman, JS NBCD Equipment Surveillance Working Group
- Program Manager, JS Mask Assessment Program
- Marine Corps Representative, JS Mask Technical Working Group
- Program Manager, Consolidated Issue Facility(CIF)

Continued..

- Chemical Warfare Convention (CWC)
Representative for MCLB, Albany
- Marine Corps Representative for NBCD
Joint Service Logistics Support Plan.
- Marine Corps Representative for NBCD
Annual Congressional Report.

Continued..

- Product Improvement Plan (PIP)
- Medical Integrated Process Team (IPT)
Voting Member
- Program Management Joint Service
Individual Combat Protective
Equipment (ICPE) Surveillance Testing

Questions?

JOINT SERVICE SET-ASIDE PROJECT

PROJECT OFFICER

HISTORY

- Support Joint Service NBCD Surveillance requirements for clothing/textile items in accordance with Memorandum of Agreement (MOA) established with Defense Supply Center Philadelphia (DSCP) and the Services

Continued..

- Nov 2001 MOA was signed between the services and DLA/DSCP. The Joint Service NBCD Equipment Assessment Program (JSNCDEAP) assumed management/management support of this process.
- JSSAP conducted NBCD equipment inventories in all DLA stocked facilities, pulled samples for storage and follow on shelf life extension testing.

Satisfying the Requirements

- The Joint Service Set-Aside Project was established in Aug 1999 at MCLB Albany, GA.
- Two additional facilities were established at Barstow, CA July 2001 and Columbus, OH Feb 2002.
- There are plans for two additional facilities pending storage and funding availability.

Continued..

- Established the DoD Shelf Life Management Web Site (<http://shelflife.pmnbc.com>). The site provides the following information:
 - ✓ Logistic information on over 384 NSN items
 - ✓ Archive for Publications and Military Specifications
 - ✓ Official message releases on extended items
 - ✓ Archive for all chemical and physical property tests
 - ✓ Searchable shelf life extension system

The DoD NBC Individual Protective Equipment Shelf Life Management System was designed to support Shelf Life Management, surveillance and notification for nuclear, biological and chemical defense (NBCD) protective clothing. Up to this point the Shelf Life Management, surveillance and notification processes have been fragmented. This web page is intended to centralize the procedures, ensuring the most comprehensive dissemination of Shelf Life and serviceability data. The Marine Corps managed Joint Service NBC Equipment Assessment Program (JSNBCEAP) has agreed to assume responsibility for Shelf Life Management, surveillance, and notification for all items identified as clothing used for protection for nuclear, biological and chemical warfare agents. The clothing and textile web site has streamlined the dissemination of information on a DoD level, assuring all chemical protective items that have been tested for shelf life extension are listed and available to all users.
